

Microgreen Seeds

Clean, untreated seed for sowing

Non GMO

Non Hybrid

Untreated

Germination
tested

Cleaned for sowing and never dressed with fungicide, because a tray you eat from has no place for a treated seed. Germination is tested on every lot.

How to grow

- 1 **Soak** only if your seed's guide says so.
- 2 **Sow** evenly on damp cocopeat in a tray.
- 3 **Cover** for 2 to 3 days in the dark.
- 4 **Uncover**, give bright light and water from below.
- 5 **Harvest** in 7 to 14 days, just above the roots.

Sowing guide for
every seed

Store cool, dark and dry. Reseal after every use. **Seed for sowing**, not packed as a ready-to-eat food.

Packed & marketed by: Fewgrams, 9th D Main, Bhyraweshwara Nagar, Bengaluru 560072, Karnataka, India. **Country of origin:** India.
